

2023 WOMEN'S HEALTH RESEARCH INSTITUTE CATALYST GRANTS

APPLICATION INSTRUCTIONS

Important dates:

Letter of Intent (LOI)	September 6, 2023 11PM PDT
Invitation to Submit Full Application	September 15, 2023
Application Deadline	October 10, 2023 11PM PDT
Anticipated Notice of Decision	November 30, 2023
Funding Start Date	December 1, 2023

Description

The WHRI Catalyst Grants support pilot studies in women's and/or newborn's health, which aim to generate preliminary data; test new approaches, methodologies or tools; bring new teams together; and/or support new research in women's and/or newborn's health from established researchers. The funding supports activities that will generate data/information that is to be used to leverage larger funding applications in the future.

Quality improvement (QI) and Quality assurance (QA) projects will be considered only if they present a clear research question to be tested. Purely QI/QA projects are not eligible.

Funds Available

Seven awards, valued at \$25,000 each, for a one-year period. Recipients can apply for a no-cost extension should the project not be able to be completed within the one-year period.

One of seven awards is related to capacity-building funds provided by CIHR's Sex and Gender Science Chair Program and will support a biomedical health research project (according to the Canadian Institutes of Health Research's definition of [biomedical research](#)) involving investigations in female animals.

Applicant Eligibility

The Catalyst Grants are intended to support researchers in British Columbia engaged in research relevant to women's and newborn's health.

At the time of application:

- The Principal Applicant must be a resident of BC.
- The Principal Applicant must be a member of the WHRI at the time of the LOI submission.
- Principal Applicants must be a researcher and/or clinician (which includes those who hold a license to practice as a member of a regulated health profession as recognized by the BC Health Professions Act or who belong to a health profession requiring board certification and are in good standing with the relevant body), must have completed a post-graduate degree (PhD or MD), and cannot be enrolled as a student in a degree or diploma program. It is expected that applicants will have appropriate training and experience in

conducting research.

- Research Associates are only eligible to apply as Principal Applicants if they have written approval from both the Department Head and the Dean where they work. These letters must be submitted with the LOI in order to meet eligibility.
- The funds must be used for a single project that is not already funded from other sources. If the recipient receives another grant for the same project, it is our expectation that the Principal Applicant will notify the Executive Director of the WHRI and that one of those grants must be declined. The PI cannot hold two separate grants funding the same project.
- An individual cannot submit more than one application as Principal Applicant. However, a Principal Applicant can be named as a co-investigator on additional applications.
- The Principal Applicant cannot have received a WHRI Catalyst Grant as a Principal Applicant within the last 3 years. This means that three full grant cycles must elapse from the competition year in which the Applicant received their grant and the competition year in which they can reapply. For example, those who received grant in the 2019 competition are now eligible to reapply for this year's competition.

Applicant Streams

There are two applicant streams for this competition which will be evaluated separately from one another: the Academic Researcher stream and the Clinician Investigator stream. Applicants will need to self-select the most applicable stream according to the criteria below. Only one stream can be selected for the application. In addition to the overall eligibility criteria:

Academic Researcher stream applicants must:

- Have a PhD, MD or equivalent, and commit a majority of their time to conducting research.
- Hold an appointment at, or have a commitment for an appointment that will begin by the award start date of December 1, 2023, at a BC institution that must allow the applicant to:
 - a. Apply for and hold peer-reviewed funds as a Principal Investigator.
 - b. Publish their research results.
- Conduct research in one of the four themes of health research as defined by the Canadian Institutes of Health Research: biomedical, clinical, health services, and population health.

Clinician Investigator stream applicants must:

- Hold a valid license to practice as a member of a regulated health profession as recognized by the BC Health Professions Act or belong to a health profession requiring board certification and be in good standing with the relevant body.
- Be actively and directly involved in patient care for at least 50% of their role and hold a role which includes making clinical judgements/decisions.
- Have a level of research experience appropriate for the proposed study and have the resources and infrastructure to carry out the proposed research activities.

Eligible Expenses

Research awards may be used for the following purposes:

- Operating expenses associated with the conduct of the study
- Research project materials and supplies
- Salary support for graduate students, postdoctoral fellows, research assistants and staff providing services to support the research activity (maximum of 50% of total budget)
- Release time to enable practitioners and/or researchers to conduct research activities (maximum of 50% of total budget)
- Statistician and data analyst services
- Database development for data collection
- Teleconference, meeting, knowledge translation and conference travel expenses
- Funding for equipment is not encouraged. However, if the equipment is necessary for an identified project, it may be considered.

Project Time Period

The time frame for the project is 12 months. Recipients can apply for a no-cost extension should the project not be able to be completed within the one-year time frame.

Communication Requirements

Catalyst Grant recipients are required to acknowledge the Women's Health Research Institute as well as the BC Women's Health Foundation in any and all communication, presentation, or publication related to the project.

Recipients are also expected to provide an academic report, a lay summary and three plain language key messages from the research project to the WHRI at the completion of the project.

Recipients are asked to present their findings at any of the following events: BC Women's Research Rounds, WHRI Public Forum, BC Women's Health Foundation 'Meet the Researcher' events.

Review Process

A peer review committee will evaluate the full application for all complete eligible submissions.

Evaluation Criteria

General review criteria will include whether:

- The research focus is innovative and relevant to women's and/or newborn's health in B.C.
- The plans and objectives of the research activities are clear and well justified.
- The investigators comprise sufficient expertise relevant to the proposed research project.
- The appropriate stream has been selected based on the status of the Principal Applicant.
- The proposed activities contribute to the training of research trainees, students and other highly-qualified personnel (HQP) engaged in research.

- The proposed activities can be achieved within the funding period. Please note that recipients can apply for a no-cost extension should the project not be completed within the funding period.
- The budget items requested are appropriate and sufficiently justified.
- The plan for dissemination of findings is well constructed.
- The proposed activities integrate [equity, diversity and inclusion \(EDI\)](https://research.ubc.ca/vpri-competitions-initiatives/edi-resources-researchers) (<https://research.ubc.ca/vpri-competitions-initiatives/edi-resources-researchers>) considerations into the research design and into the research and training environment.
- The Principal Applicant has completed the LOI and fulfilled the requirements specified in "How to Apply".

How to Apply

The application process for this funding opportunity consists of a letter of intent and full application. It is the responsibility of the applicants to ensure that their letter of intent and application is complete prior to submission.

1) Letter of Intent

Applications that fail to submit a letter of intent by the deadline will not be eligible for funding. The Letter of Intent should include the following information:

- i. Information for Principal Applicant and Co-Investigators (if any). Provide the name, title, name of institutional affiliations and email address. Please note that the list of co-investigators should not change (i.e., no new additions) between the LOI and the full application submission. Conflict of interest declarations for grant reviewer assignments are based on the project team members listed in the LOI submission.
- ii. Contact information for Project Contact, if different from Principal Applicant.
- iii. If the Principal Applicant is a Research Associate, a letter of support from the Dean and the Department Head are required at the LOI stage.
- iv. Project title.
- v. Abstract (maximum length of 250 words).
- vi. Applicant stream (i.e., Academic Researcher or Clinician Investigator stream). This will be reviewed at the time of the LOI submission to ensure correct category assignment.
- vii. Keywords.
- viii. Indicate if your application should be considered for the biomedical health research project involving investigations in female animals.

The LOI is due on September 6, 2023 at **11 PM** PDT. It must be submitted using the following link: <https://rc.bcchr.ca/redcap/surveys/?s=J9L3FLETFTYP4LTH>

Please note: You will not be able to save the LOI in the online submission system once it has been started, so please ensure you can complete the LOI submission in a single sitting.

2) Full Application

On September 15, 2023, an email invitation to submit a full application will be sent to each Principal Applicant who meets the eligibility criteria, which will allow them to upload and submit the full application in pdf format. Please note that a [UBC Research Project Information Form](https://research.ubc.ca/support-researchers/research-project-information-form) will need to be completed with this application if the Principal Applicant has a UBC affiliation (<https://research.ubc.ca/support-researchers/research-project-information-form>)

The full application is due on **October 10, 2023 at 11pm PDT**. No late submissions will be accepted under any circumstances.

Format

Proposals must be written in Arial font (regular) minimum 11pt. Single-spaced text with 2 cm margins on letter size (8½ x 11" (21.2 x 27.5 cm) and saved as a pdf. **Note:** the application file name should be the last name of the principal applicant ('lastname.pdf').

A) Cover sheet (Up to 1 page)

- i. Contact information for Principal Applicant and Co-Investigators (if any). Provide the name, title, name of institution, department name, mailing address, phone number and email address for each investigator.
- ii. Contact information for Project Contact, if different from Principal Applicant
- iii. Applicant stream (i.e., Academic Researcher or Clinician Investigator stream)
- iv. If your application should be considered for the biomedical health research project involving investigations in female animals, please indicate so in your cover letter.
- v. Contact information for the financial administrator, including mailing address, phone number, and contact email address
- vi. Information on host institution: The host institution is most commonly a publicly-funded BC health research institution or university responsible for administering award funds
- vii. Project title / Team Name
- viii. Expected duration of the project, including anticipated start and end dates
- ix. Total budget amount
- x. Lay summary with title (maximum length of 250 words)

B) Proposal (4 pages)

The proposal should include a clear, concise description of the research plan that includes:

- i. Overall objectives
- ii. Rationale for the study (Including Background)
- iii. Study hypothesis and aims
- iv. Study design, methodology and analysis plan
- v. Anticipated results

- vi. Study time line
- vii. Relevance to the health of women and/or newborns in British Columbia

C) Appendix (2 pages maximum)

- i. Dissemination or knowledge translation plan. In this section, please address the following points:
 - Describe the Knowledge Translation goal(s) of the project (e.g. to generate awareness, to inform future research).
 - List your knowledge users or target audience (e.g. clinicians, decision makers, patient partners).
 - Name the KT strategies you will employ to achieve your KT goals (e.g. presentations to specific knowledge user groups, engagement of knowledge users within the project team, create a plain-language social media toolkit of findings).
- ii. Future goals outlining how the catalyst grant will facilitate future funding and research.
- iii. Inclusion of highly-qualified personnel (HQP). Briefly describe how research trainees, students and/or other HQP will be included in the project.
- iv. Consideration of equity, diversity and inclusion (EDI). In this section, please describe how EDI considerations will be incorporated into the proposed activities, including in your recruitment (e.g., participants, trainees/employees), training of highly-qualified personnel (HQP), experimental design and dissemination of project findings (as appropriate).

D) References (5 pages maximum)

E) Budget and Justification (1 page maximum)

F) Amounts and sources of other research funding (excluding salary funding), for the Principal Applicant (1 page maximum)

Give titles, brief description, amounts and duration of awards, along with nominated principal investigator and all co-investigators. Indicate percent overlap with the current application. If the list of other research funding for the Principal Applicant exceeds 1 page, please prioritize the funding presented in this list to the largest sources of funding and the sources of funding that are the most relevant to the proposed project (so that this list will fit within the 1 page limit).

G) CV and Letters of Support:

- i. Letter of departmental or institutional support which indicates how the research fits within the department or institution's strategic plan and /or addresses women's health
- ii. Letter(s) of support from other organizations involved with the research study, if applicable
- iii. CVs of Principal Applicant and Co-Investigators in [CIHR Project Biosketch Application Format](#). Note that if your research team includes patient and/or community partners as co-investigators, the [CIHR Applicant Profile CV format](#) can be chosen instead (if preferred), as this particular CV format may better align with the expertise and lived experience that patient/community partners bring to the proposed project.

Submission Instructions

The LOI is due on **September 6, 2023 at 11PM PDT**. It must be submitted using the following link:
<https://rc.bcchr.ca/redcap/surveys/?s=J9L3FLETFTYP4LTH>

Please note: you will not be able to save the LOI in the online submission system once it has been started, so please ensure you can complete the LOI submission in a single sitting.

The full application is due on **October 10, 2023 at 11pm PDT**. A link to the application platform will be emailed on September 15, 2023 to principal applicants who submitted an LOI.

Questions about the application process can be sent to Kathryn Dewar (kdewar@cw.bc.ca).
